

CHEMISTRY, TOXICOLOGY, and QSAR: an introduction

Luigi Cardamone, Computer Engineering, Politecnico di Milano
Magdalena Gocieva, Computer Engineering, Politecnico di Milano
Marina Mancusi, Biomedical Engineering, Politecnico di Torino
Rima Padovani, Biomedical Engineering, Politecnico di Torino
Lorenzo Tamellini, Mathematical Engineering, Politecnico di Milano

Principal Academic Tutor:

Giuseppina Gini, Politecnico di Milano

Other Academic Tutors:

Bartolomeo Montrucchio, Politecnico di Torino

External Tutor:

Emilio Benfenati, Istituto di Ricerche Farmacologiche 'Mario Negri'

1	Summary	3
1.1	Outline.....	3
1.2	How this report is organized	4
2	Toxicology and prediction	6
2.1	Toxicology principles: modes of action.....	6
2.2	Theory of QSAR models	10
2.2.1	What are molecular descriptors.....	10
2.2.2	Which are the endpoints of interest.....	13
2.2.3	Statistic theory of QSAR / How to construct models	15
2.2.4	Ethic and economic impacts of QSAR	20
3	The REACH regulation.....	23
3.1	REACH in general	23
3.1.1	Registration	24
3.1.2	Evaluation	24
3.1.3	Authorization	25
3.1.4	Restrictions.....	25
3.2	REACH focusing on QSARs	26
3.2.1	Validity of QSAR model.....	27
3.2.2	Validity of QSAR prediction	28
3.2.2	Adequacy of QSAR prediction	28
4	Users' Requirements	30
4.1	Research Institutions' requirements.....	30
4.2	Firms' requirements	32
5	State of the Art and tools.....	34
5.1	QSAR models in practice.....	34
5.2	Available software	37
5.2.1	Computational tools for applying QSARs	38
5.2.2	Chemistry Development Kit (CDK)	39
5.4	Overview of interesting websites on REACH	43
5.4.1	Websites totally dedicated to REACH.....	43
5.4.2	Websites partly dedicated to REACH.....	44
6	Conclusion	46
7	Bibliography.....	47
	ANNEX: List of software, databases, websites on QSARs and REACH.....	49
